Success Criteria — Q4 2025 Exit Conditions

Narrative & Category (Achieved = Green)

-  Master narrative published and adopted by 100% of GTM teams
-  3+ tier-1 feature stories published
-  SOV baseline established at 5-8% in AI collaboration category
-  Brand style guide in use across all assets

Team & Operations (Achieved = Green)

-  5-6 core team members hired and onboarded
-  Operating rhythms established (weekly sync, monthly BR, quarterly planning)
-  KPI dashboard implemented with weekly/monthly reporting

Launches & Activation (Achieved = Green)

-  2 product/feature launches shipped with measurable activation lift (15%+)
-  Sales/CS enablement kit delivered with 80%+ adoption
-  100+ MQLs generated from integrated campaigns

Developer Ecosystem (Achieved = Green)

-  Developer marketing program launched (docs, tutorials, hackathon)
-  50+ agents published to marketplace
-  500+ developer signups via DevRel campaigns

Brand Health (Achieved = Green)

-  Brand awareness measured and baselined
-  Message pull-through tracked (target 60%+)
-  Pipeline influence attributed (target \$500k+ influenced ARR)

Risks & Mitigation Strategies

Risk 1: Hiring Delays

Impact: Team capacity constraints; delayed launches

Mitigation:

- Leverage interim contractors or agencies for critical gaps
- Prioritize P0 hires (PMM, Growth, PR)
- Extend hiring timeline into Q1 if needed; don't compromise on quality

Risk 2: Narrative Misalignment

Impact: Internal confusion; weak market positioning

Mitigation:

- Over-communicate early and often (all-hands, training, Slack)
- Get exec buy-in before broader rollout
- Create self-serve assets (one-pagers, FAQs, style guide)

Risk 3: Launch Execution Issues

Impact: Poor activation; missed media opportunities

Mitigation:

- Use 8-week launch process with clear RACI (see TEAM_OPERATIONS_GUIDE.md)
- Run pre-launch checklist and dry runs
- Have contingency plans for major blockers

Risk 4: Low Media/Analyst Interest

Impact: Weak SOV; limited brand awareness

Mitigation:

- Invest in relationships early (background briefings)
- Develop multiple story angles aligned to news cycles
- Leverage customer stories and research for proof points

Risk 5: Developer Ecosystem Slow Start

Impact: Low agent volume; marketplace stagnation

Mitigation:

- Provide clear incentives (hackathon prizes, marketplace featuring, revenue share)
- Over-invest in docs, tutorials, and support
- Build internal "hero agents" to seed marketplace
